Summary

Engineering manager with 12 years in software: nine as a full-stack engineer across TypeScript/Node.js services, React clients and Go and Python backends, then three leading up to 9 engineers across two teams at Ecologi, a B Corp. I owned delivery, people and budget, and led the team's move to AI-assisted development. Still hands-on: I build and run an LLM agent in production on the side. Remote for four years, based in Spain.

Experience

Senior Software Engineering Manager · Ecologi (B Corp, remote) Jun 2023 – Jul 2026

Software Engineering Manager from Jun 2023, promoted to Senior in Feb 2025.

- Managed 9 engineers across two cross-functional squads, grown from a single team of 5; owned delivery from TypeScript/Node.js services to the React client, working with Product and Design from problem definition to launch.
- Ran the full people cycle: 3 promotions, 2 hires, compensation decisions, a 6-month PIP through to resolution, and zero voluntary attrition in three years.
- Led the move to AI-assisted development with Claude Code and Codex across technical design, code generation and code review. Built momentum rather than mandating it: AI fireside chats and shared channels where engineers posted wins and use cases. The team delivered 2-3x faster with a leaner headcount.
- Owned the engineering budget: consolidated redundant tooling and ran the R&D Tax Credits claim for Product & Engineering, recovering €10k+ a year.
- Improved the CI pipelines both teams shipped through, and created the Databricks workspace and the data pipelines feeding it.
- Ran Ecologi HackDays, giving engineers dedicated time to build and ship their own ideas.

Senior Software Engineer · Ecologi Feb 2022 – Jun 2023

- Designed and built core backend features on the Ecologi Zero platform; took PoCs to live products across React, GraphQL, TypeScript/Node.js, PlanetScale and MongoDB.

Freelance Full-Stack Developer Sep 2020 – Feb 2022 · May 2017 – Jun 2018

- Delivered backend and full-stack solutions for international clients across Python, Java/Spring, Go, Node.js and Vue/React; owned architecture and infrastructure.

Full-Stack Developer · King (Barcelona) Jun 2018 – Sep 2020

Shared Technology from Jul 2019.

- Shipped features, migrations and production incident fixes on Service Layer, King's core content and messaging platform serving 50M+ daily active users across all games.

Co-Founder · Luffa Shop (Barcelona) 2018 – 2021

- Built the e-commerce platform, tracking and operating processes; grew the business to ~€100k annual revenue and 2,200+ orders a year, profitably.
- Replaced hand-picked cross-sell with data-driven recommendations: mined order history into a ranked co-purchase table shown on every product page.

Full-Stack Developer · iContainers (Barcelona) Nov 2015 – May 2017

- Built 3rd-party API integrations (AdWords, CRM, Freshdesk) and full journey analytics tracking on AWS Lambda, Go, PostgreSQL and MongoDB.

Early career · Criteo · Sopra Steria Nov 2014 – Oct 2015

- Technical Solutions Engineer at Criteo, implementing retargeting and conversion-tracking tags across advertiser accounts. Previously Java/Spring developer at Sopra Steria.

Projects

Running Coach: LLM agent in production · run.camboulive.solutions 2026 – present

- Built and operate a free running app whose AI coach changes training plans through a Claude API tool-use agent: bounded tools, a propose-and-confirm loop so the user approves every change, and a shared validator the model cannot get around.
- Designed the eval stack: offline golden tests for the plan engine, live end-to-end evals against the real model with hard safety gates and scored quality graders.

Skills

Management: Delivery and roadmapping, hiring, onboarding, performance and growth, engineering budget, R&D Tax Credits, Kanban/Agile, OKRs
AI engineering: Claude Code, Codex, Claude API tool use, agent guardrails, LLM evals
Languages: TypeScript, Node.js, Python, Go, React, GraphQL, Java/Spring
Platform and delivery: CI/CD, GitHub, Docker, Kubernetes, AWS (incl. Lambda)
Data: PostgreSQL, MongoDB, PlanetScale, Redis, Databricks

Education

MSc Business Administration and Management · IAE Nancy
MSc Computer Engineering · TELECOM Nancy

Certifications

Effective Manager Bootcamp · Learngility · Apr 2026
Attract & Recruit · Onboarding · Engagement · Performance & Growth
